Route de la Nouvelle-France (New France Route) links Old Québec to the Côte-de-Beaupré and traces the path taken by inhabitants of the Côte-de-Beaupré when bringing their crops to Québec City.

As you follow the Route de la Nouvelle-France through Old Québec, Saint-Roch (the city’s first working class neighbourhood) and Limoilou, the architecture of the local buildings testifies to the evolution of the city since the founding of the colony. Houses farther from the downtown core reflect the influence of French and English culture and the Québec spirit of innovation.

Many heritage structures and sites can be found along the Route de la Nouvelle-France, such as the colony’s first windmill (1651), first pilgrimage site – namely the shrine of Sainte-Anne-de-Beaupré (1658) –, ancestral homes, root cellars and many other historical treasures.

The Route de la Nouvelle-France has been integrated into the “Route verte” provincial bike path network. It is also called the Marie-Hélène Prémont Bike Trail.

On foot, by bike or by car, follow the signs to the tourist route.

Get from the square in front of city hall (Place de l’Hôtel-de-Ville), where the outdoor market was located during the New France period, to L’îlot des Palais, and then to Gare du Palais. From there, complete the tour by car, crossing the Saint-Roch and Limoilou neighbourhoods and the borough of Beauport until you get to chemin Royal, then avenue Royale. [Ad p. 50]
